

A Winning Combination!

New 2-way, 200 psi close-off, chrome and stainless steel ball valves expand our selection, ensuring you'll easily find and quickly install the right size assembly for the job.

Replacement Guide

You may mix the new ball valves with current or older ball valves in the system without any problems or concerns. GDE, GLB and GMA actuators are interchangeable between the new and previous version ball valves. Spring return GQD actuators are compatible with the new ½ and ¾ inch ball valves since they have lower torque than the current ball valves. Cross reference the old part numbers to the new part numbers. Note that nine new part numbers (Cv values) are being added to the portfolio.

Chrome Valves		Stainless Steel Valves		Description	Comments
Old Part No.	Part No.	Part No.			
599-10203	599-10300	599-10300S		0.5" 2W 0.4 Cv Ball Valve	—
