

Can I Pay Less And Be More Secure?

Yes, use Siemens Remote Security Management Access Control Monitoring and Management.

What is our offering?

Siemens hosts the management software and servers for your access control system in our UL® Listed Central Monitoring Station. We leverage our trained security professionals to monitor your access control system and your security protocols while minimizing your upfront costs and giving you complete transparency and control. Our certified security operators provide continual, round the clock, effective monitoring and management of these systems.

Our outsourced services include:

- Alarm/Event Monitoring and Management – Proactive response to alarms and events.
- Connection Monitoring and Management – Identify system and connections malfunctions.
- System Administration – Day to day administration of your system including card administration, access control and reporting.
- Hosted Servers – Siemens hosts the access control servers reducing capital and operational expenses.
- Server Upgrades – Any required upgrades to the system are done automatically.
- Software Upgrades – Ensures the system is running on the most current version.
- Maintenance – Standard upkeep of the servers to ensure proper functioning and minimizing downtime.

Our web-based management software provides additional services:

- 24 x 7 Availability – You can access this hosted, on demand portal to run your own access control administration and management reports.
- Card Administration – Add and delete cards and cardholders.
- Access Control – Manage the access levels, holiday schedules, holiday group, door group, and card sets.
- Reporting – Monitor activities and events of your cards, doors, and alarms.

How do we do it?

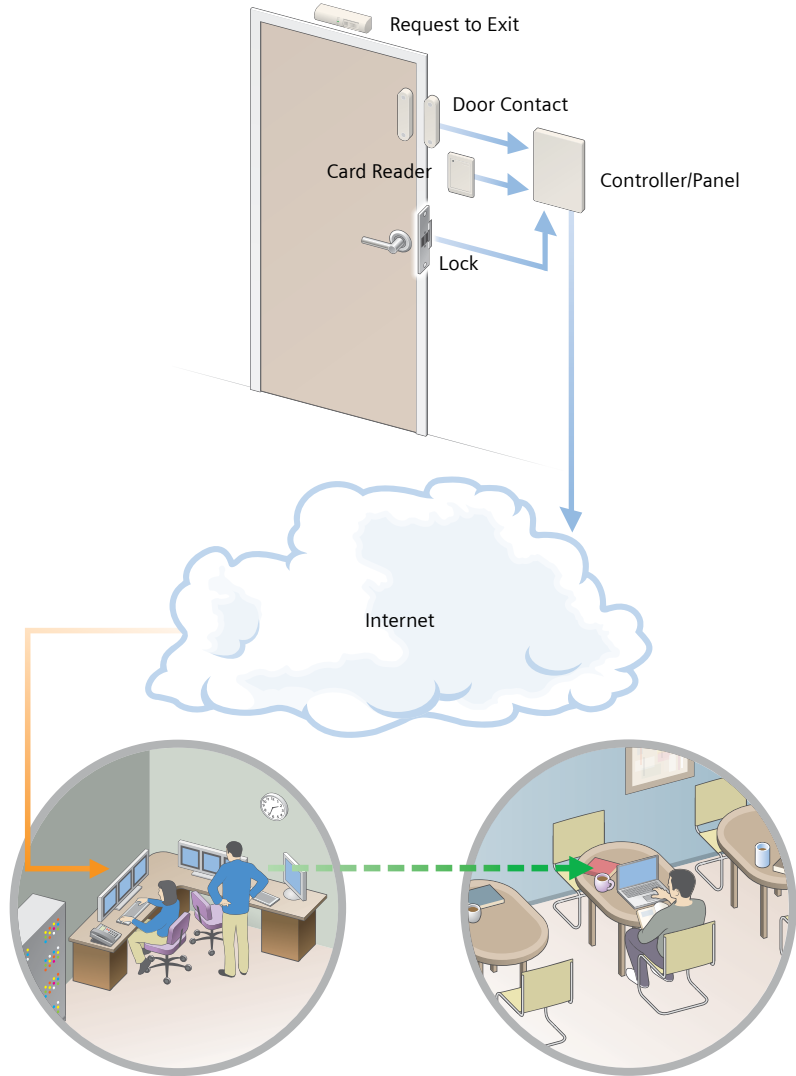

The System: Using a secure internet connection, Siemens links your access control system with our UL® Listed, 5 Diamond Certified Central Monitoring Station. The connection can go directly from your access control system to our server.

The Management: Once Siemens links to your existing system, we customize your interface to our access control web portal. The web portal will provide you with access to add and delete cards, set up access levels, and run reports.

Why Siemens?

At Siemens, we ensure the right mix of our People, Application, Systems and Services to meet your needs. This means we decrease your costs so you can spend your security funds elsewhere. Our service allows you to control enforcement of your security policies, while eliminating the need for you to manage an IT infrastructure.
