

Can I Pay Less And Be More Secure?

Yes, use Siemens Remote Security Management Video Monitoring and Management.

What is our offering?

Siemens offers hosted video management software that is managed by our trained security professionals.

Our software capabilities include:

1. Video Alarm Verification – We verify any alarm generated from your sensors that go through your panel (including motion, intrusion or access control) using real time video from your cameras.
2. Video Guard Tours – We review and record video from each camera at scheduled time intervals of your choosing.
3. Video Alarm Management – Alarms generated through sensors in the camera itself (built- in analytics or motion sensor) go directly to Siemens for verification without going through a panel.
4. Video Escort – We utilize your cameras to visually escort any person or asset that moves from one location to another.
5. Management Web Portal – On demand access to your information including video and management reports, live video and playback.

In addition to our software capabilities, our offering includes:

- Reliable connection through either a dedicated network or through your private network.
- Access to professional security operators and technical support 24x7x365.
- Leverage your existing video system.
- Secure connection – just like it's in your own facility.

How do we do it?

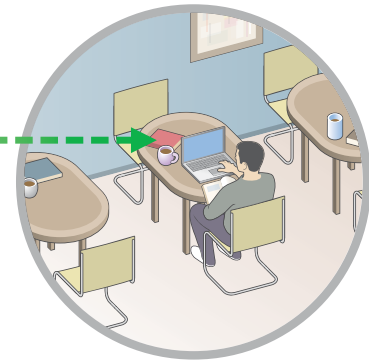

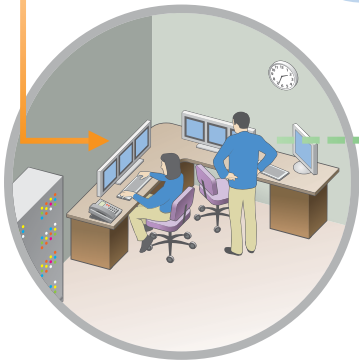

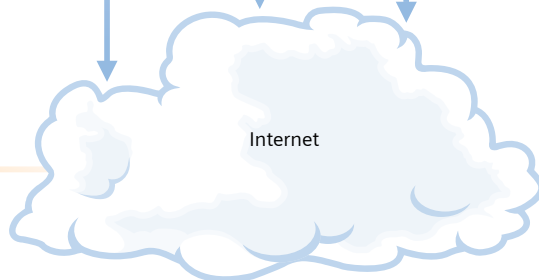

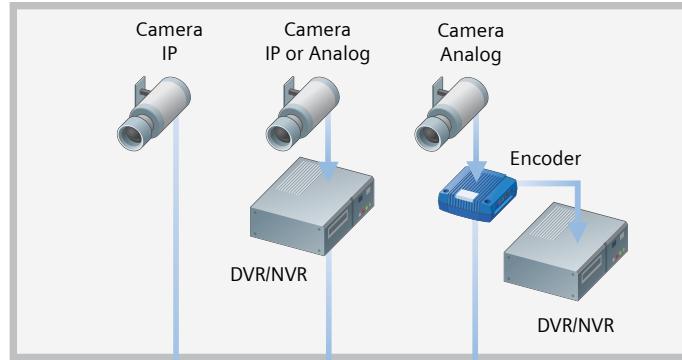

The System: Using a secure internet connection, Siemens links your video system with our UL® listed, 5 Diamond Certified Central Monitoring Station. The connection can go directly to your cameras if they are IP enabled or it can go to your DVR/NVR.

The Management: Once Siemens links to your existing system, we customize your interface to our video management web portal. The web portal will provide you with access to reports, live or recorded video and playback. Based on your requirements, levels of access to the web portal can also be created to ensure only your select team members have use of the system.

Siemens Remote Security Management

Customer Location (Multiple Configurations Possible)

Siemens

- Enforce security policies
- Real time response
- UL® Listed
- CSAA 5 Diamond Central Station Designated

Web Portal

- Remote access
- Event/Alarm reports
- 24x7x365 availability

Why Siemens?

At Siemens, we ensure the right mix of our People, Application, Systems and Services to meet your needs. This means we decrease your costs so you can spend your security funds elsewhere. Our service allows you to consistently enforce your security policies, while eliminating the need for you to manage the resources that provide these capabilities.
